## PROJECTS

College Social Portal

**Language :** Php , MySQL

**Description :** This is our final year project. We are still working on it and this project is helpful for colleges, students and teachers. The main objective of this project is to develop college students to interact with their faculties.

Quiz Game

**Language :** Python

**Description :** A quiz game project in Python challenges users to answer questions and earn points. It can include multiple-choice or true/false questions, with a scoring system to track progress. The game can be timed or randomized, making it a fun way to learn and practice coding skills.

Super Store Sales Dashboard

**Tool :** Power BI

**Description :** The Super Store Sales Dashboard in Power BI displays key sales metrics like revenue, product performance, and regional sales. It provides interactive visuals to help users track trends and make informed business decisions.
